

Description

This document highlights the Voices in the main MEL-LABS release that do not require any of the custom samples in MEL-LABS. It is intended for those of you that don't have at least 16 mb of DRAM or Flash Memory, and/or don't have the optional SCSI board for your EX. A number of these Voices are also included in the MEL-LABS Starter Kit release.

On the following pages, look for the rows that are NOT shaded in blue.

Don't Miss It...

Don't miss all the great sounds in the main MEL-LABS release. In the main release, you'll also find the full documentation of the project, and full Data Lists for the Samples, Waves, and Voices. For those of you that don't have at least 16 mb of DRAM or Flash Memory, and/or don't have the optional SCSI board for your EX, we hope that this release gives you the incentive to add these "must haves". You'll find that they open a whole new world of sounds for your EX!
