Mick's 16 - SY to EX

from Mick Norman

A great collection of samples and voices from the SY85 for your EX5, including:

- **16 EX Waves (54 Samples!)**
- **16 SY85 Voices**
- **16 Bonus Voices**

Requirements: A SCSI equipped EX5/7/R with at least 4 mb of DRAM or Flash memory.

You'll find some outstanding and unique sounds in this release, especially the Strings, Choirs, and Pads. I had a great time tweaking Mick's samples and putting together this collection of his work for everyone. Many many thanks to Mick for sharing this with the EX5Tech community!
